

MARINE CONSERVATION EXPEDITION PRO

4 WEEK PROGRAM

Our 4-week marine conservation program is for those taking sabbaticals or gap years and especially for individuals studying or aiming for a career in diving or marine science. This course requires in water experience, and leads you to a PADI Divemaster. Professional hands on training is given in areas of Marine Conservation, Marine Mammal Observation and Underwater Acoustics. It is the most intense program and it is perfect for students aiming to gain extra knowledge and experience of field work.
